

Environmental Policy

1. Compliance with Laws

We will comply with the laws and regulations related to environmental conservation to reduce the environmental impact of our business activities.

2. Contributing to building a recycling-oriented society

We will work towards sustainable use of resources and energy to build a recycling-oriented society. We will strive to minimize the use of resources and energy, and promote the use of renewable resources and energy, including recycling.

3. Reducing environmental impact

We recognize the environmental impacts such as greenhouse gases, waste, and wastewater.

We will promote environmentally friendly corporate activities while considering emission reduction and treatment to reduce environmental impact.

4. Biodiversity conservation

We recognize the importance of preserving biodiversity and we will strive to reduce the negative impact of our business activities on the environment and biodiversity.

5. Education/Awareness activities

We aim to raise awareness of environmental improvement through education and act with an awareness of our own responsibility towards the environment.

6. Thorough management of chemical substances

We recognize that chemical substances have a significant impact on human health, safety, and the environment. We will strive to prevent environmental pollution and occupational accidents by thoroughly managing chemical substances.
